5. **RATIONALE JUSTIFYING USE OF CITED STATUTORY AUTHORITY:**

The current Repair Method Code/Repair Method Suffix Code (RMC/RMSC) is:

3

R

Repair Class J&A (BOA)
Revised Jan 2014

CJ&A#:

N00104-15-G-A401 repair BOA (Replacement for expired N00104-10-G-A001 Repair BOA)

Requisition/PD#

N0010415YRA27

RMC 3. Repair, for the second or subsequent time, directly from the actual manufacturer.

RMSC R. The Government does not own the data or the rights to the data needed to contract repair of this part from additional sources. It has been determined to be uneconomical to buy the data or rights to the data. It is uneconomical to reverse engineer the part.

This acquisition will be negotiated with: Hamilton Sundstrand Corporation - Pomona, CA (CAGE code: 26581)

6. DESCRIPTION OF EFFORTS MADE TO SOLICIT OFFERS FROM AS MANY OFFERORS AS PRACTICABLE:

The proposed contract action was synopsisized in the FedBizOpps website for government-wide point of entry on:

19 FEB 2015

The following sources have expressed an interest in this acquisition: Synopsis did not result in new vendors expressing interest.

Market Research was conducted in accordance with FAR Part 10. The results of the market research conducted (or the reason market research was not conducted) is as follows:

Sole source repair depot (CAGE code: 26581) for NIINs listed on Attachment A.

Market Research was conducted using the following databases: ITIMP (Integrated Technical Item Management & Procurement) system, NSEDR (Naval Ships Engineering Drawing Repository), Navy ERP (Enterprise Resource Planning), FLIS (Federal Logistics Information System). The Government failed to procure adequate technical data needed to repair, troubleshoot, perform fault isolation and test these items. The articles to be repaired are complex and must meet operational and reliability requirements, the achievement of which requires unique production techniques and extensive and/or sophisticated testing. CAGE code 26581 (Hamilton Sundstrand Corporation - Pomona, CA) possesses the necessary technical expertise and data rights to provide the required level of repair performance needed to meet fleet requirements. Market research was not conducted in accordance with FAR Part 6.302-1 (a) (1). Citation: 10 U.S.C. 2304(c)(1) and FAR Part 10.002 (b) because the Government does not own the data or the rights to the data needed to contract repair of parts listed in Attachment A from additional sources. It has been determined to be uneconomical to buy the data or rights to the data for parts listed in Attachment A. It is uneconomical to reverse engineer the parts listed in Attachment A.

7. DETERMINATION OF FAIR AND REASONABLE COST: The contracting officer determines that the anticipated cost to the Government of the supplies covered by this Class J&A will be fair and reasonable.

8. ACTIONS TO REMOVE BARRIERS TO FUTURE COMPETITION:

For reasons set forth in paragraphs 5 & 6, NAVSUP/WSS has no plans at this time to compete future contract for the type of supplies and services covered in this document. If another potential source emerges, NAVSUP/WSS will access whether competition for future requirements is feasible.

9. REFERENCE TO THE APPROVED ACQUISITION PLAN:

An informal / formal acquisition plan is / is not required for this acquisition.
